Document Specifications

1.1 Purpose

The following document describes and defines both the functional and non-functional requirements of the Nature Notes web app, to be implemented in Sprint 3.

1.2 Scope

The scope of Sprint 3 begins to widen as the core functionality of the web application has been, for the most part, completed. The goals for sprint 3 and sprint 4 are as such going encompass ideas for improvements to the already implemented features, such as improving the music experience, more intuitive location selections, and usage while offline.

2 Functional Requirements

ID	Requirement Description
<i>FR 1</i>	The website shall have a mode in which the user does not have to provide a location, choosing the playlist and music themselves.
<i>FR 2</i>	The website shall have a location selector that chooses a place at random.
<i>FR 3</i>	The website shall have an improved music player, with extended functionalities.

3 Non-Functional Requirements

ID	Requirement Description
<i>NFR 1</i>	The User Interface of the website shall be updated to look better and provide an easier time to the user.
<i>NFR 2</i>	The additions to the website shall not impede its design or usability.
<i>NFR 3</i>	The website shall continue to provide apt and quick functionalities regardless of additions.
